PROFILE

As a graduate of Middle East Technical University and currently a Master's student and Research Assistant at Bilkent University who believes that architecture is not just about the function or efficiency of the place but also the emotions that the place serve to make people connect with itself. I'm highly interested to the history of art and what does art actually tell. The frescoes and detailed drawings at the churches and cathedrals and their meanings attracts me much. I love to build connections in an emotional and ideological way with the places, books and musics that make me feel in various ways. Also I love to dance, play piano and make theatre.
